

REACH DECLARATION OF CONFORMITY

CONCENS A/S supports the objectives of REACH (Registration, Evaluation, and Authorisation of Chemicals no. 1907/2006), and is aware of the obligations associated to a company to comply with the directive including informing our customers whenever substances from the candidate list is found in our products.

With regard to the requirements of Article 33/candidate list of REACH "Duty to communicate information on substances in articles", CONCENS A/S is constantly monitoring the SVHCs (Candidate List of substances of very high concern for Authorisation currently released by ECHA) in our products, and CONCENS A/S has an ongoing process of gathering declarations to ensure that none of the substances are present in our products with a concentration equal to or above 0.1%. The current ECHA candidate listing can be found on: <http://echa.europa.eu/candidate-list-table>

All products made by CONCENS A/S comply with the Regulations of Substances of Very High Concern (SVHC), (EC) 1907/2006, (SVHC<0,1%), except from lead. Currently, in CONCENS A/S products, this substance is to be found in a concentration above 0.1% (w/w) in steel alloys, brass, aluminium, and electronic components. Where reasonably technically possible, CONCENS A/S aims to substitute lead in our products.

CONCENS A/S will make all reasonable efforts to ensure appropriate and timely handling of updates in the REACH directive. Responsibilities and appropriate resources have been allocated to enable us to comply, for which reason CONCENS A/S has set up a procedure to handle and ensure REACH compliance. As a part of this procedure, CONCENS A/S uses a third-party compliance database to gather information regarding REACH. The declarations are provided by the suppliers, and the suppliers are required to update their declarations every 6 months.

The information contained herein is based on REACH declarations from our sub-suppliers and is to the best of our knowledge accurate and reliable as of the date of publication. However, CONCENS A/S does not assume any liability for the accuracy and completeness of such information.

A declaration is required if a manufacturer produces products, which may contain more than 0.1% concentration of SVHC weight by weight (w/w), at the article level. The products listed below include articles, which may contain SVHCs above the threshold level of 0.1% weight by weight. Note that the products listed in the following table are manufactured by Concens A/S.

SVHC		Products	
CAS: 7439-92-1 EC: 231-100-4	Lead (RoHS-exemptions)	Metal Alloys	All actuators produced.

Esbjerg, Denmark
