

NEW integrated controller

Intelligent actuators with integrated controller (icon) enable the use of **MODBUS RTU** on an RS485 serial communication. One of the industry's most powerful standards.

The icon actuator provides everything from easy maintenance, control, and installation to a wide range of customisable settings and feedback that will help tailor the solution to your specific needs or application.

Features

- Integrated controller
- Internal stroke limitation
- Internal heat protection
- Interface MODBUS RTU on RS485
- Interconnection up to 128 units - synchronous max 8 units
- Plug & Play solution with conXion box
- Software for easy setup
- Adjustable start ramp
- Adjustable stop ramp
- Adjustable current limit
- 6 Configurations available

For more information on Modbus RTU please go to www.modbus.org MODBUS over serial line specification and implementation guide V1.0

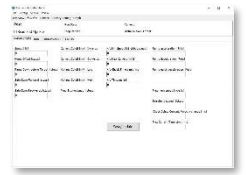

Specifications

The new product line icon is based on the same physical dimensions as our long-term product line con35/50/60, but with the main feature of the icon series being that the controller unit is integrated within the actuator.

Accessory list

- conXion box -> CC-971-01-0000-00-00
- Handset -> CC-HST-001920-011000
- Programming cable (USB-RS485) -> CC-874-01-0000-00-00
- Power supply 24VDC/2A w/cable (EU/UK/US/AU) -> CC-980-02-0000-00-00
- Downloadable software ([Concens Actuator Studio](#))

Contacts

For further information or a product demonstration on the icon series - the intelligent actuator from Concens with integrated controller, do not hesitate to contact our Partner near you or us directly if there is no local presence in your country.
